PROFILE

Highly detailed and technically sophisticated with 5+ years of experience in UI/UX Design and Frontend Development. Seeking to leverage coding and designing skills for improving the performance, scalability and reliability of development projects and providing long term solutions to front-end problems.

CORE TECHNOLOGIES

Languages/Tech:	HTML5, CSS3, JavaScript, GSAP, jQuery, Structured Query Language (MySQL, SQLite), Python, Java, C, C++, PHP, React.js, node.js, express.js, MongoDB, Stripe, HubL, Bootstrap, Next.js.
Platforms:	Windows, Unix, MacOS
Applications:	Figma, Adobe XD, Wordpress, Wix, Spline, Adobe Photoshop, Adobe Illustrator, Adobe After Effects, Adobe Premiere Pro, Jupyter Notebook, MS Word, MS Excel, MS PowerPoint, Jira, Postman, Hubspot, Gather Content, Monday.com, Hotjar, VWO, Google Analytics, Google Tag Manager, SAP, Cursor, ChatGPT, V0, Figma AI, Firefly, Inngest, Coderabbit.

WORK EXPERIENCE

Web UX Designer/ Developer | Varicent (07/2022- 02/2025) **Toronto, Ontario**

Skills: Hubspot, Gather Content, Monday.com, VWO, Hotjar, Google Analytics, Google Tag Manager, Figma, Adobe XD, HTML5, CSS, Bootstrap, JavaScript, GSAP, jQuery, Adobe After Effects, Adobe Photoshop, Adobe Illustrator, Git.

- Developed and deployed responsive websites using HubSpot CMS, including custom modules and templates tailored to specific design requirements.
- Managed HubDB for dynamic content handling—fetching, updating, and rendering structured data within HubSpot
- environments.
- Used Bootstrap as the primary front-end framework across the Varicent website to build responsive and consistent user interfaces.
- Integrated GatherContent to streamline content collaboration and fetch approved assets for seamless publishing.
- Created and maintained blogs, webinars, and scheduled newsletters to support content marketing and engagement
- strategies.
- Performed A/B testing using VWO and gathered user insights with Hotjar to drive continuous UX improvements.
- Worked on UI/UX design such as conducting user research, wireframing, prototyping, and refining user journeys to enhance
- usability and satisfaction.
- Created personas, journey maps, task flows, and information architecture models to translate complexity into clear user
- pathways.
- Designed wireframes, prototypes, and interaction patterns in Figma to visualize concepts and validate usability.
- Conducted end-to-end user research including behavioral analysis, heatmaps, and funnel reviews to uncover user needs,
- pain-points, and improvement opportunities.
- Facilitated co-creation and collaboration sessions with cross-functional teams to align ideas, define problem statements, and
- co-design solutions.
- Conducted usability tests and synthesized insights into actionable UX recommendations that improved clarity, navigation, and
- user satisfaction.
- Applied WCAG accessibility principles to ensure inclusive and universally accessible digital interfaces.
- Leveraged AI tools (Figma AI, cursor, V0, Firefly, Claude) to accelerate ideation, generate concepts, and support rapid
- prototyping workflows.
- Utilized data-driven design decision making using Hotjar, Google Analytics, and VWO to optimize layouts, reduce friction, and

- enhance user engagement.
- Optimized design systems and development workflows for improved performance, scalability, and maintainability.
- Designed and developed microsites under the Varicent brand for campaigns and targeted marketing initiatives.
- Supported the governance and structured maintenance of the centralized design system to ensure consistency across all digital touchpoints.
- Established and maintained reusable component libraries in Figma aligned with frontend implementation standards.
- Applied atomic design methodology to organize UI components into scalable, modular structures.
- Defined and documented component usage guidelines, interaction behaviors, and visual standards to promote cross-team consistency.
- Conducted periodic UI consistency reviews to ensure correct implementation of approved components and patterns.
- Partnered with Product Managers, UX Designers, and Developers to drive adoption and correct usage of design system standards.
- Contributed to improving scalability and efficiency by aligning Bootstrap-based implementations with documented design guidelines.
- Maintained structured design documentation to support onboarding, knowledge sharing, and long-term system sustainability.

UI/UX Designer/Frontend Developer│ Freelance (06/2021- 10/2025) **Toronto, Ontario**

Skills: Figma, Adobe XD, HTML5, CSS, JavaScript, GSAP, jQuery, React.js, Adobe After Effects, Adobe Photoshop, Adobe Illustrator, Node.js, Express.js, Postman, Material UI, Git, Stripe.

- Creating a website design based on the client's preferences of color, font and style.
- Motion Graphics videos created for different products using Adobe After Effects.
- Figma and Adobe XD were used to create wireframes and Prototypes.
- Creating Web Page designs and Mockups.
- User interface development using HTML5, CSS3, JavaScript, React.js, Bootstrap, and SVG animations using jQuery and GSAP.
- Creating Wireframes, Low-fidelity and High-fidelity Prototyping.
- Developing and maintaining design wireframes and specifications.
- Using Stripe library on E-commerce applications for processing the payments.
- Keeping current with industry trends and competitor products and communicating design prototypes.
- Responsible for conducting user research, user interviews, competitive analysis, and brainstorming on different approaches to solve UX problems. Comparing the user experience of existing applications and working to design better alternatives.
- Build reusable components with HTML, CSS, and JavaScript for use across large-scale properties and document them in style guides.
- Understanding of Material UI Design.

UI/UX Designer/Frontend Developer│ Legos Graphics (06/2019-06/2021) **Toronto, Ontario**

Skills: Figma, Adobe XD, HTML5, CSS, JavaScript, GSAP, jQuery, React.js, Adobe After Effects, Adobe Photoshop, Adobe Illustrator, Node.js, Express.js, Postman, Material UI, Git.

- Creating Web Page designs and Mockups.
- Worked with non-technical stakeholders with the ability to give them an understanding of the boundaries and parameters of the current system.
- Design and develop the web pages using HTML5, CSS, JavaScript and GSAP Animations.
- Creating Wireframes, Low-fidelity and High-fidelity Prototyping.
- Motion Graphics videos created for different products using Adobe After Effects.
- Developing and maintaining design wireframes and specifications.
- Keeping current with industry trends and competitor products and communicating design prototypes.
- Delivering well-documented, high-quality, and robust technical design and code
- Comparing the user experience of existing applications and working to design better alternatives.
- Done custom client-side validation using JavaScript.
- Designing the tabs, pages, controls and buttons for the website.
- Creating a website design based on the client's preferences of color, font and style
- Choosing the most effective places to advertise for each product or services
- Figma and Adobe XD were used to create wireframes and Prototypes.

Web Developer | Hewlett-Packard Enterprise (07/2017-06/2019) **Mangalore, India**

- **Skills Highlight: HTML5, CSS, JavaScript, PHP, MySQL, Adobe XD, Adobe Dreamweaver, Git.**
- Creating Web Applications using HTML5, CSS, JavaScript and PHP.
- Assisting in the delivery of project tasks and assignments according to specifications.
- Developed a Matrimony Website from scratch to a working model.
- Expertise in developing Single Page Application (SPA) and Responsive Web Design (RWD)
- Designed and revamped a construction management website to a responsive web interface.
- Developed and worked with SQL Views in manipulating and filtering data.
- Updating existing applications with innovative ideas to make it more user-friendly.
- Collaborating with team members to determine the website's layout, content and design.
- Developing the standards of codes and libraries such that they are easily traceable

---

EDUCATIONAL BACKGROUND

Post Graduate Diploma in Interactive Media Design - Toronto, Ontario, Canada

Bachelor of Technology in Computer Science Engineering - Karnataka, India

CERTIFICATIONS

The Creative React and Redux Course, Issued by Dev Ed, 9/2021

Google Analytics 4 (GA4)

PROJECTS

- **BAWD Fashion Store – MERN Stack (Ecommerce Application)**

  Spearheaded an Interactive Web Application from scratch using React.js, Node.js, MongoDB, Express.js for adding, retrieving, deleting and aggregating the products and users in the application. Design and manage the database architecture and the whole backend flow from the database till the User Interface. Developed Admin Dashboard for managing and displaying all aggregated analytics from the database. Integrated STRIPE with the application as a payment gateway for charging the customers while checking out.

- **Retail Installation**

  To conceptualize an outfitters company based in Southern Ontario and to design for a complete multi-screen project, aimed at interactive retail installation and video displays. Designing and developing a brand from scratch, starting from the logo design till the integration to the interactive multi-monitor. Modules including gesture controlling and light sensors were used for interacting with the product designed.

- **Digital Signage – Web App**

  A dynamic digital signage dashboard designed to show all the details regarding various department details, weather data, logo display, current date and time, news section, motion graphics and commercial advertisements. All the data were based on Durham College.

- **TODO – Mobile App**
  To design a mobile application with captivating User Experience and User Interaction design and capture the attention of the target audience in an easy to use interface. Every person needs a one stop solution for all tasks, irregularities, distractions, missing minutes of the meeting, managing audio notes and lack of prioritization. Taking pain-points from the user as consideration and implementing a high-fidelity prototype. This Mobile app is designed in Figma.

- **Detection of Objects and Automatic Braking System**
  To design and develop an autonomous car model which detects and reacts to obstacles and hurdles and moves accordingly. Traffic lights, sign boards and lane recognition are also the main attraction of this project. The common library used was OpenCV for image processing which detects lanes and signals. Various python packages were used to train the model too.
